Parish Announcements:

We would like to welcome all Visitors who are with us celebrating the Holy Mass this weekend.

Please check our **Parish Website /Calendar** for updated schedule of events.

Please join us for praying the Holy Rosary on Sundays before 9:00 AM Holy Mass. It starts at 8:30 AM.

Second collection. Today we support those who have given a lifetime. Women and men religious have dedicated their lives to service—praying, teaching, and caring for those in need—usually for little to no pay. Today, their religious communities do not have enough retirement savings. Your donation provides for the essential care, medicine, and daily needs of thousands of senior women and men religious. Please give generously.

Our Lady of Guadalupe Holy Mass – December 12th, Thursday at 6:30 PM. Please join us.

Advent Penance Service with Holy Adoration – Friday, December 13th at 6:00 PM. Fr Williams Ospino will help with Spanish/English Confessions.

Hour of Grace – Sunday, December 8th – 12 :00 – 1:00 PM

Last Week's Collection: \$ 787.00

Please visit: stpatrickstelluride.com/donate to offer your financial support.

Pastor's Corner

Dear Parishioners and Visitors,
Believing that the Eucharist is truly the Body, Blood, Soul and Divinity of our Lord, Jesus Christ, can be difficult, even for some Catholics. In order to strengthen our faith in the Real Presence God has blessed us with many Eucharistic Miracles throughout the history of the Church. Let's learn about some of them as we celebrate Eucharistic Revival in our Church in America.

(Part 5) Sokolka, Poland. “At first I was convinced that it was a blood clot” - said Professor Sobaniec-Łotowska. But the truth was much more surprising! The two scientists of Białystok, who for their own independent investigations, made use of the most modern optical microscopes and the transmission electronic microscope, have reached the same conclusion (Professor Sulkowski, did not know that the sample which he was examining came from a Host): the sample examined was neither a clot, nor blood ... it was a human cardiac muscle tissue still alive. And, something even more incredible, it was a cardiac muscle with typical indications of the final phase that precedes death. The scientists of Białystok have analyzed the sample taken in purely scientific terms and not fideistic. The drafting of the protocol on the part of the two scientists of Białystok required two weeks. When the Curia of Białystok became aware of the incredible results of the analyses, it formed a special Ecclesiastical Commission convened by the Archbishop on March 30, 2009. His task consisted in examining the miracle from the theological point of view and in listening to all who had seen the Host or who had been witnesses of those extraordinary events. The work undertaken by the Ecclesiastical Commission has produced the following statement: “The Host from which the sample was taken for the examination is the same one that has been transferred from the sacristy to the tabernacle of the chapel in the rectory. The intervention of strangers was not observed”. This was moreover categorically excluded also by the two scientists of Białystok. It is not possible to manipulate an event of this type. No one, absolutely no one, would have been able to do it. “Even the scientists of NASA, who have at their disposal the most modern analytical techniques, would not be able to artificially recreate such a thing”, affirmed Professor Sobaniec-Łotowska, adding that this fact has been for her of particular importance. Viva Cristo Rey!
